

Today's Medicaid Managed Care Program

Fragmentation & Silos of Information

ODM's six MCOs are responsible for provider credentialing.

Provider

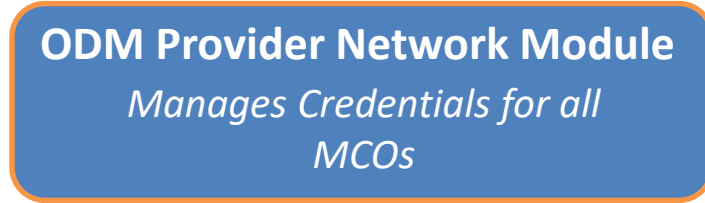

Redundancy Driving Administrative Burden

Each provider performs the same credentialing tasks for each MCO in order to be reimbursed

Next Generation of Ohio's Medicaid Managed Care Program

Improving patient care by reducing administrative burdens for Ohio's Medicaid providers

Centralized credentialing **eliminates the need to perform six unique credentialing processes**, easing the administrative burden felt by providers serving Ohio's Medicaid members.

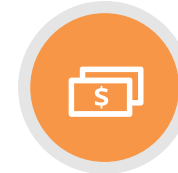

Managed Care Organizations

Standardizing processes and documentation will help:

Reduce repetitive work

Improve the revenue cycle

Lower credentialing costs for providers
